SUMMARY

Lead Backend Engineer with 7+ years of deep expertise in Django, DRF, and data-heavy microservices. Expert in building and scaling systems, did same for 150+ companies, including a performance overhaul that cut critical latencies from 40s to <1s. Brings hands-on production experience with LLM/RAG features and secure OpenAPI design. Focuses on "quiet reliability" to create clear, maintainable architectures that stay fast under load and allow the team to ship with confidence.

CORE STRENGTHS

Python • Django/DRF • FastAPI • Microservices • Observability • PostgreSQL/Indexing/Query tuning • REST/OpenAPI • MongoDB/Redis • Elasticsearch • Docker • CI/CD • Monitoring/Logging (Splunk) • Performance profiling (Silk) • LLM/RAG (LangChain/LangGraph, pgvector) • Hybrid ACL/RBAC • Third-party integrations (Billing, Data platforms) • Agile/Product ownership

EXPERIENCE

Innovation Technology By Design (TeamGPS) — Backend Lead | Remote | Oct 2021 – Present

- **Social Feed & Rewards platform** (Django, PostgreSQL, Tango Card): onboarded 100+ companies and 7,000+ employees; 30,000+ monthly shout-outs; multi-currency wallets; admin controls and automated credit-card funding.
- **1:1 & Group Meetings**: agendas, private notes, carry-forwards; Outlook .ics sync; 200,000+ meetings created; used by 1,000+ managers and individual contributors to structure check-ins.
- **Real-time KPI/Scorecard service** (Python microservice, MongoDB; MSPBots ingestion): 80,000+ datapoints/day; reduced dashboard latency from 20–40s to <1s across 150+ tenants.
- **Performance-management suite**: quarterly/yearly reviews + analytics; 1,500+ reviews/quarter for 30+ tenants; inputs into promotion and pay.
- **Public API platform**: OpenAPI with versioning, key management and hybrid ACL/RBAC securing 8,000+ users; interactive Swagger/OpenAPI docs.
- **Performance engineering**: report times cut from 8–10s to <500ms; key page loads from 3s to 250ms via Silk profiling and targeted PostgreSQL indices.
- **Observability & reliability**: GB-scale Splunk logging/alerts; Outlook calendar sync; data-ingestion microservice for ticket KPIs.

GreyB Services — Software Developer | Mohali | Jul 2018 – Sep 2021

- **PQAI (AT&T collaboration)**: AI-assisted patent similarity search (Python, Keras/NLTK, MongoDB); used daily by hundreds of attorneys/analysts.
- **Catalyst**: ML-curated patent trend explorer, problem-statement detector & one-line summarizer used by 50+ enterprise clients for technology foresight.
- **NPLSE**: Centralized search from 13 sources with 5.6 million non-patent documents; reduced analyst search time from 3 weeks to 3 days (Elasticsearch).
- **Patent data pipeline**: automated USPTO crawler indexing 13.4M patents with weekly CI/CD refresh (Docker) and exposed searchable corpora via MongoDB and Elasticsearch.

PROJECTS

Code Architecture Mapper (cam.theshikhar.com) | Sep 2025 – Present

- Multi-agent AI system using LangGraph for automated code architecture understanding. (LangGraph + FastAPI)

Document AI Chat (document-ai-chat.theshikhar.com) | Aug 2025 – Sep 2025

- Production RAG application with pgvector + Google Gemini enabling semantic Q&A on PDFs (LangChain + FastAPI)

Portfolio Generator | Jun 2025 – Jul 2025

- Open-sourced Next.js 14 template for one-click deployment with JSON-driven content (React.js + Next.js)

EDUCATION

Bachelor of Engineering in Information Technology | 2014 – 2018

University Institute of Engineering & Technology (Panjab University)

- CGPA - 8.55, was IT coordinator in Training and Placement Cell

AWARDS & IP

- Edison Award 2019 (Silver), Applied Technology — AI patent search innovation
- Published Patent Application — US20230161800A1 (ML/NLP method for patent objective extraction)

TECHNICAL SKILLS

- Languages/Frameworks: Python, Django, DRF, FastAPI, Flask, JavaScript (ES6), React, Next.js
- AI/LLM & Data: LangChain, LangGraph, Prompting, RAG, Embeddings, OpenAI/Gemini APIs, NLP (NLTK), Pandas, OpenCV, pgvector
- Datastores: PostgreSQL, MongoDB, Redis, Elasticsearch, MySQL
- DevOps/Tools: Docker, CI/Jenkins, AWS (EC2/S3), Vercel, Splunk, Silk Profiler, Swagger/OpenAPI
- Testing & Methods: PyTest, Selenium, Jest, Cypress, TDD, Agile/Scrum

ADDITIONAL INFO

- Languages: English, Hindi
- Volunteer: Be My Eyes volunteer (helping blind and low vision people), Mentoring juniors
- Hobby: Playing tennis
